

SUN ECON R-4052E

Features SUN ECON R-4052E is a mold cleaner suitable for cleaning aluminum molds such as shoe outsoles.
It does not corrode molds like conventional strong alkali cleaners.

Application Removal of residue after resin molding
Especially effective for aluminum molds

Physical Properties
1.Appearance : Transparent liquid.
2.Smell : Non.
3.Specific gravity : 1.07 (20°C)
4.pH : 9.5 (Undiluted solution)

How to Use Spray R-4052E on the mold when the mold temperature is high.
Scrub the mold with a brush, etc. to remove any contamination.
After cleaning, water is sprayed to remove the chemical from the mold.
Depending on the degree of contamination, immersion cleaning may also be performed.

Packing UN 20kg
